<table cellspacing="10" border="0" style="text-align: center; width: 899px; height: 264px;"> <tr style="text-align: left;"> <td valign="top" style="width: 250px; text-align: left;"></td> <td valign="top" style="width: 540px; text-align: left;"> <div style="text-align: left;">DYNOEXELIXIS software combines superior mechanical expertise with an♦ unequivocal capacity to calibrate the most complex automotive computer electronics. When you experience an DYNOEXELIXIS software upgrade for your vehicle, you will begin to realize our world of intelligent tuning. DYNOEXELIXIS software calibrations have been tested under the most grueling conditions during dyno simulation in our state-of-the-art AWD MAHA LPS3000 dyno cell as well as in real world driving on the street and on the race track. We further scrutinize and refine our software during our eDRIVE independent product validation program to produce unmatched results. Our stringent testing assures pure, crisp and consistent power in all of the conditions you enjoy your vehicle. We spend 100% of our R&D efforts on the development and testing of performance software, period!</td> </tr> </table>

<table cellspacing="10" border="0" style="width: 899px; height: 293px;"> <tr style="text-align: left;"> <td valign="top" style="width: 500px; text-align: left;"> <div style="text-align: left;">♦ We spend 100% of our R&D efforts on the development and testing of performance software, period! The combination of our meticulous mechanical expertise, painstaking attention to details and our unequivocal capacity to calibrate the most complex automotive computers, clearly♦ sets♦ us♦ apart♦ in♦ the world♦ automotive software tuning. DYNOEXELIXIS performance software represents the apex of technology where pure adrenaline is fused with ♦ULTIMATE PERFORMANCE. Another other critical aspect of ECU tuning is to possess complete hands on mechanical understanding of the latest generation high performance engines.♦ This is the foundation of DYNOEXELIXIS and the combination of our extreme testing and tuning measures coupled with our immense mechanical knowledge and engine building skills clearly sets DYNOEXELIXIS as a true leader in all aspects of engine tuning and engine development. <p>
